BENELIFTS - POWER OF EXPERIENCE AND INNOVATION

Benelifts S.r.l. was established in Milan, Italy with personnel of over 20 years of experience in elevator industry. With tireless efforts in the quest for sustainable values and innovative business solutions, Benelifts S.r.l. has built a network of friendly manufacturers and reputable business partners globally.

Along with the trend of urbanization and modernization, the demand for diversified elevator products to meet the increasing tastes of customers is also an irreversible trend in the world. Together with the famous elevator brands that are strongly penetrating all markets, local manufacturers, especially in developing countries, have also made certain strides in building their identity. However, the technological and engineering gap is still a big obstacle for local partners to overcome in comparison with European players, for example. In fact, the long history of mechanical engineering and the sophistication of design is the testament to the "made in Europe" quality of products originating from this continent.

Capturing the trends and respectable aspirations of local manufacturers in an effort to elevate quality and branding, Benelifts S.r.l. sets itself on the mission of being the *elite team* of the local manufacturers. In that role, we work to help local partners optimize their business solutions; get easy access to European-class sourcing locally with Benelifts branded materials and industry-leading brands.

Benelifts S.r.l. strives to create effective solutions and bring exceptional added value to all of its business partners in every market that we are available. There, Benelifts S.r.l. appeared as a driving force of the industry with a wealth of experience and continuous innovation.

Welcome new friends on the journey to share opportunities and cooperate successfully!

ABOUT US 

BENELIFTS' ACTION GUIDELINES

Benelifts Style

Benelifts brings class for our customers with exquisite products, details in each of the smallest components of the product, The accessories connect with each other properly, Material constitutes in high quality and long-term durability.

At Benelifts, whatever the customer's requirements, we strive to fulfill that request in the best way. We understand the value of providing effective solutions to constantly create and increase brand value, products for customers.

With long-term operational experience, professionalism and a strong willingness to cooperate, we communicate openly and listen to customers' requests from the smallest elements to ensure that we understand your requirements. It's creatively right from the start. Everyday, Benelifts is making unique differences for customers on the road to conquer long-term success.

Benelifts is also proud to be a place of dedication and working of a team of experts, technicians who are dynamic, creative and have experience in all stages from smallest components to full lift. The company provides products with highest quality, on-time delivery and perfect after-sales service.

BENELIFTS

BUSINESS SOLUTIONS

Production quality control

We are proud to say that Benelifts was originally born as a real yard of ideas, rather than just a trading company, considering its strong dedication to research and investments in innovative customer orientated systems. Quality and reliability: the two pillars on the basis of which a company constantly seeks to improve, through the implementation of products at the forefront of technology. Both the design and production phases are based on the use of the latest 3D CAD tools and modern CNC machines. Most of Benelifts factories are green facilities, perfectly integrated into the environment, at the forefront of green production through the use of photovoltaic panels, 14001 and EMAS (Eco-Management and Audit Scheme) certifications and the use of recycled materials.

Logistic

We like to reduce the distances taking care of all aspects of the delivery, animating production and transportation activities all about customer's needs. Benelifts can rely on a solid fleet of vehicles (articulated lorries, trucks, and special vans all equipped with tail lifts) which allow our company to be closer to the people who strongly believe in sharing a project, with the guarantee of a fast and punctual delivery, thanks to a new generation of integrated logistics systems. As a matter of fact, the optimization of the company's productivity is based on an effective coordination of the phases of supply, production and delivery, both nationally and internationally.

24/7 Support

Benelifts is available to its customers at all times. Users can use a web portal which offer the possibility of not only tracking order in real time, but also of downloading certificates, projects and other plant technical reports (besides projects and technical concerning metal shaft structures).
